- *Geographical area of intervention*

Catalonia, Spain.

- *Occupation/specialisation*

We offer advice to companies and organizations on all environmental issues in order to comply with regulations and respect the environment. We support, manage, intervene and advise. In addition, we support businesses so they can achieve improved technical development and manufacturing from the start of the process, carrying out and advising on an appropriate and sustainable engineering and industrial design.

## *Short and long term objectives*

- Contribute our expertise to all organizations that require it, to work jointly with the aim of improving the global sustainability and respect for the environment.

## *Key needs*

- Greater impulse from the public administration towards environmental issues.
- Greater awareness concerning environmental issues on the part of businesses and society at large.

## **Environmental services**

Sustainability services for companies and municipalities; mobility, urban planning, waste management, planning and management of natural areas, environmental management and assessment, corporate social responsibility and sustainable construction services.

- Strategic Environmental Assessment.
- Environmental Impact
- Sustainable Construction Services
- Sustainability
- Environment and Companies
- Environmental Education

## Our offer

- Engineering activities in relation to sustainable industrial design and eco-design.
- Development of projects valuing residues.
- Development of eco-products.
- Eco-labels (European and regional eco-labels).
- Life cycle analysis.
- Climate change adaptation plans.
- Integrated service for the management of carbon emissions.

**We work with the objective of assisting our clients to develop more secure, sustainable and efficient organisations.**

## *Our advantages*

### ***Differentiation***

Standardised work is not undertaken.

### ***Personnel***

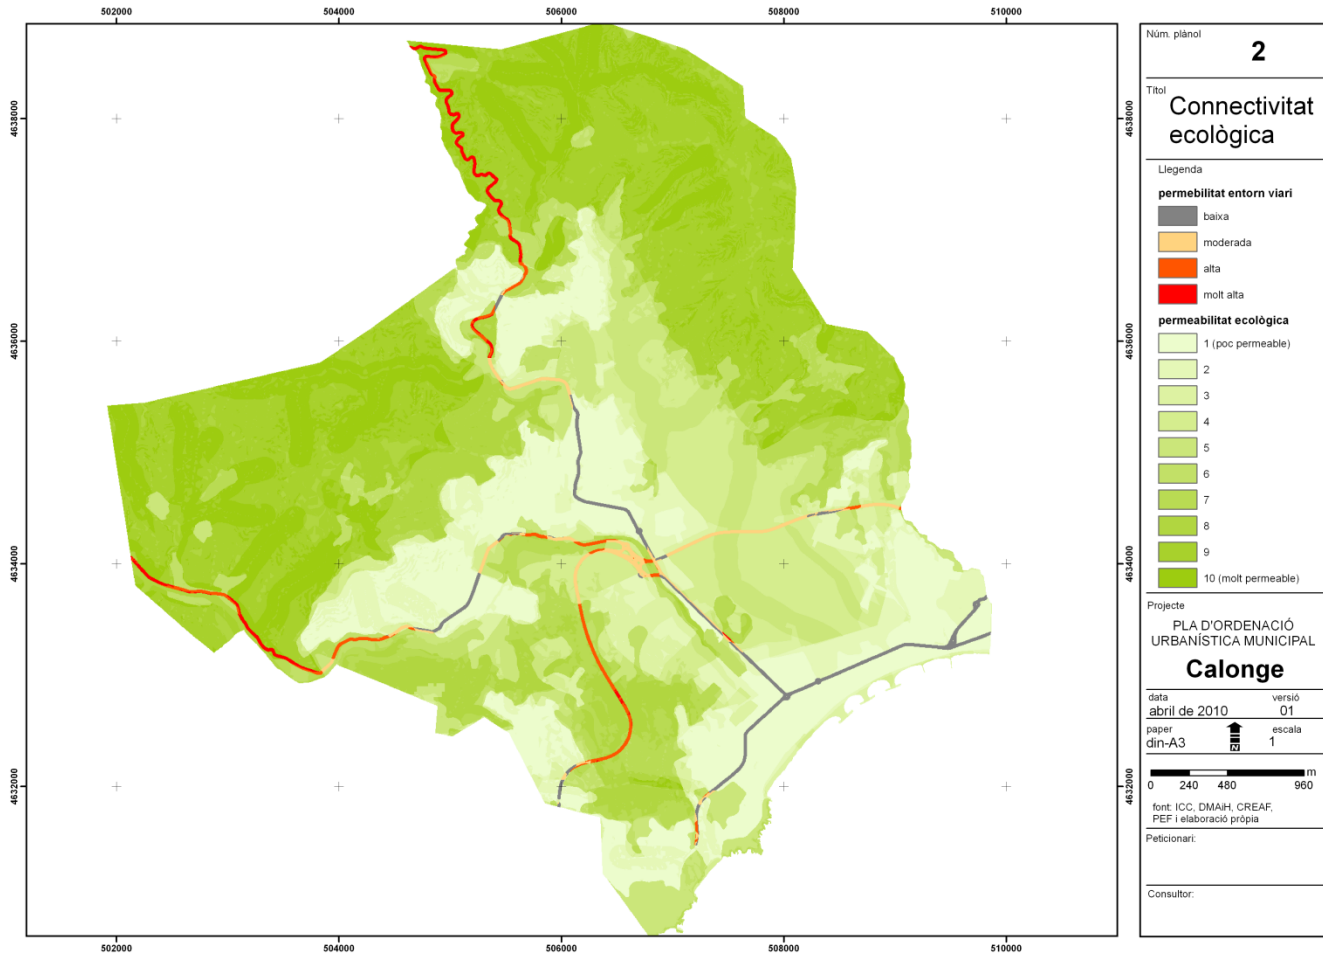

A young, agile and flexible team, to face up to the challenges of a wide variety of projects.

Support from a wide network of collaborators with expertise in their fields.

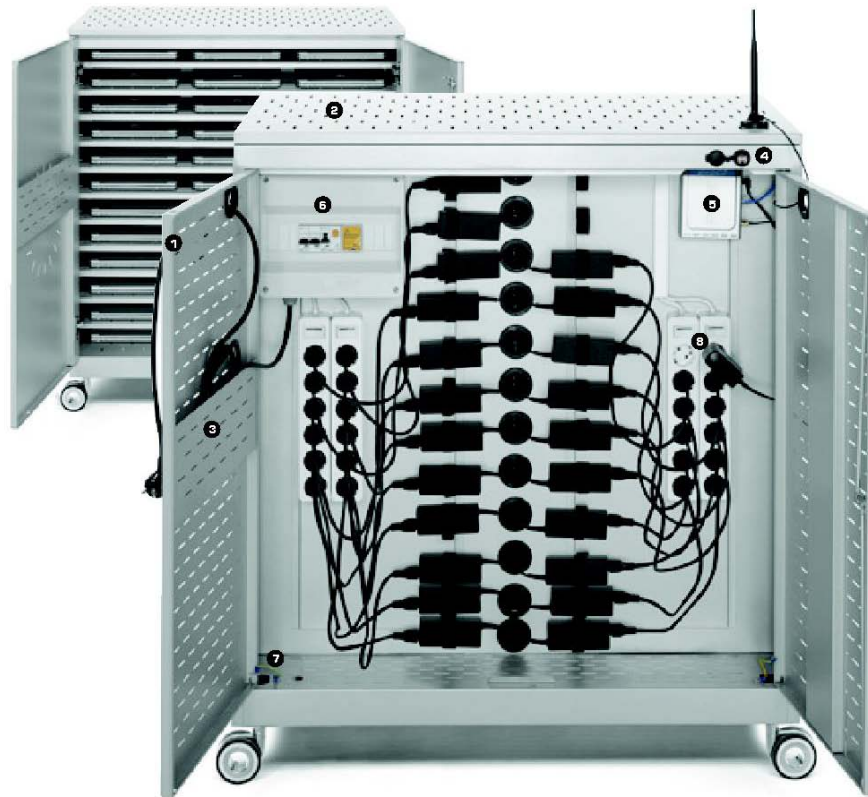

### ***Training***

An important investment in the training of personnel.
